

Course on Soft Tissue Management Around Implants

11-13 March 2026

Mostar, Bosnia & Herzegovina

Dr. Ricardo Kern

**11 March 2026 (Day 1 – Lecture)**

**The perfect harmony of Soft Tissue**

- The pink and white aesthetic balance philosophy,
  - Concepts for digital planning,
  - Surgical aesthetic rehabilitation Facial Analysis,
  - Take home Recorded Material: Digital Planning Step By Step for KeyNote/PowerPoint
- 
- Key Points for Immediate Implants Immediate Temporization in the Aesthetic Zone
- 
- From Biology to prosthetic management. Factors that affect the stability of tissues around implants. What may influence bone loss and periimplantitis development around implants,
- 
- Provisional design for immediate temporization in immediate implant cases and on grafted sites
- 
- Decision-making process: how deep place implant platform x Abutment design anatomy of emergence profile
- 
- CT graft for immediate implants
- 
- FP-1 Management: Full maxilla implant, Soft tissue graft, temporization, and conditioning cases

**Note:** During this day the participants will have coffee breaks, lunch and social event in the evening. They are included in the program.

## **12 March 2026 (Day 2 – Hands On)**

### **Building up soft tissue Day**

- Harvesting mucogingival grafts - Fundamental skills development exercises for window technique
- Tuberosity FGG and de-epithelialized CT graft Sub-epithelial CT Graft
- Vertical building Techniques
- Tabletop Concept
- VIP-CT for Bone regeneration
- VIP-CT for Vertical soft tissue Deficiencies

## **13 March 2026 (Day 3 – Hands On)**

### **Getting deeper into soft tissue management around implants**

- Simple flap movements: Roll “S” flap
- Doble Roll “S” flap
- Roll “S” flap extended
- Roll “S” flap spitted periosteum for bone graft
- Advanced flap movements: FGG around Implant
- Apically repositioned Flap
- Apically repositioned Flap in full arch for all on “X” approaches
- Reverse planning and decision-making process for soft tissue management in full-arches in Immediate Implants Immediate temporization in deficient fresh sockets.
- Aesthetic Compromised implants; Step-by-step how to classify and treat implants with Perio Implant tissue deficiency, from simple to advanced approaches. Full protocol discussion from planning, grafting, and prosthetic management

- Vertical/Horizontal deficient sites in the aesthetic zone; Step-by-Step for build-up the proper tissue framework in the aesthetic area, from simple to advanced cases. Full protocol discussion from planning, grafting, and prosthetic management.
