

# DAY 1

## Morning

### Lectures:

- **General principles and technical aspects of Full Arch Immediate Loading surgery**
  - Literature, biomechanics, common features, myths and facts
  - Diagnosis, exams, patient preparation and case preparation
- **Surgery features**
  - Anatomy, incisions and flaps
  - Bone reduction, implant placement and abutments
  - Upper jaw surgery-specifics
  - Lower jaw surgery-specifics
  - Primary stability hacking: how to get good primary stability in low class bone
- **Case presentation and discussion**
- **Drugs and post-op recovery and maintenance**
- **The complete AO4 protocol**
- **Soft tissue grafting in full arch surgery**

## Afternoon

### Lectures:

- **Advanced techniques: pushing the limits**
  - Palatal Approach Technique
  - Trans-nasal implants
  - Trans-sinus implants

### Hands-On Session 1

- Standart AO4
- Palatal Approach Technique
- Trans-Sinus Implants
- Trans-Nasal Implants

## Night

### Dinner:

- **Dinner Party**

# DAY 2

## Morning

### Lecture:

- **Pterygoid Implants**
  - Literature review;
  - Anatomy, CT scan reading and planning;
  - Technical aspects: flap, drilling, implant placement and abutments;

### Hands-On Session 2

Identify the pterygoid bone in human people

### Hands-On Session 3

Pterygoid Implants training in models

## Afternoon

### Lecture:

- **The new age of Subperiosteal Implants**
  - Literature review;
  - Old-school VS New-school of subperiosteal implants
  - Technical features
  - Placement technique
  - Complication

### Hands-On Session 4

Subperiosteal Implants training in models
