

## **PERIO-PROSTHO COURSE AGENDA**

### **Day 1 (15 JANUARY 2027)**

#### **Perioplastic surgery around implants and pontic sites**

- Biology and basic principles of mucogingival surgery
- Reverse planning and prosthetic guided implant surgery
- Soft tissue grafting techniques around implants and pontic sites
- Digital tools in modern Implantology
- 

#### **Resolution of peri-implant aesthetic complications**

- Prevention of soft tissue recessions around implants
- Diagnosis and interdisciplinary treatment planning
- Pre-surgical prosthetic preparation
- Surgical approaches on soft tissue dehiscences around implants
- CAF vs Tunnel

#### **Hands-on session: surgical techniques on perio-plastic procedures**

- Connective tissue harvesting techniques
- Tunneling procedures (VISTA approach, palatal sliding flap, rotated pedicled flap)
- Modified coronal advancing flaps
- “Platform” technique concepts
- Managing tension free flaps for regenerative procedures

***Day 2 ( 16 JANUARY 2027)***

**FP1 approach in full mouth implant rehabilitations**

- Fundamentals behind the philosophy
- Lab communication and multifunctional guide design
- Immediate loading and provisionalization in FP1 full arch
- Prosthetic guided soft tissue healing concept
- Second stage approaches
- From provisionals to the definitive bridge

**Prosthetic soft tissue management**

- Provisionalization in Implant Dentistry
- Emergence profiles shaping in implants and pontic sites
- Digital prosthetic workflow

**Notes\*: The lunch meals, coffee breaks, course instruments & materials, social events are included in the price.**
