

COURSE WITH DR. FABIO SCUTELLA
10-11 APRIL 2026
DELTA DENT ACADEMY, TIRANA, ALBANIA

1st Day:

FROM TOOTH PREPARATION TO TEMPORARY DELIVERY

THEORY

1. CLINICAL AND SCIENTIFIC ANALYSIS OF TOOTH PREPARATION FINISHING LINE
 - a. the horizontal finishing line (90° shoulder, rounded shoulder, chamfer)
 - b. the vertical finishing line: the feather edge
 - c. soft tissue response around artificial crowns depending on the finish line form
2. RELATIONS BETWEEN THE FINISHING LINE AND THE PERIODONTAL SUPPORT
 - a. the biologic width (BW) concept
 - b. soft tissue management and healing time after tooth preparation
 - c. problems related to the violation of the BW
3. THE SIMPLIFIED PROSTHETIC PROTOCOL (SPP) PRESENTATION (with video)
 - a. dedicated armamentarium
 - b. clinical step-by-step procedures presentation (with video)
 - c. Problems created by wrong tooth preparation
4. TEMPORARY PHASE MANAGEMENT (with video)
 - a. temporary crowns technical preparation features
 - i. Direct Technique: composite materials chair-side
 - ii. Indirect Technique: heat pressed temporary lab made
 - b. dedicated armamentarium
 - c. provisional cementation

HANDS-ON

1. TOOTH PREPARATION
 - a. preparation on phantom teeth with a shoulder finishing line
 - b. preparation on phantom teeth with a vertical finishing line
2. PROVISIONAL RELINING AND FINISHING
 - a. relining of shell temporary crown on the phantom with direct and indirect methods
 - b. finishing and polishing

2nd Day

FINAL IMPRESSION PROCEDURES AND FINAL DELIVERY THEORY:

- 1.FINAL IMPRESSION: TIMING, MATERIALS AND TECHNIQUES (with video)
 - a.timing: when can I make the final impression after tooth preparation?
 - b.which impression materials are more suitable with the SPP?
 - c. use of digital scanners with vertical preparation
2. THE SIMPLIFIED PROSTHETIC PROTOCOL APPLIED BY THE DENTAL TECHNICIAN
 - a.fabrication of the master cast
 - b.finishing line demarcation
 - c.trimming and ditching
 - d.prosthesis manufacturing
- 3.RESTORATIVE MATERIAL SELECTION AND FINAL CEMENTATION (with video)
 - a.Overview of the principal restorative materials: Metal-Ceramic, Zirconia and Lithium Di-silicate
 - b. Mechanical and esthetic properties of the materials
 - c. material selection based upon the clinical case features
 - d. Fit-checking methods of restorations on a vertical preparation
 - e. cementation protocol according to the selected material

HANDS-ON

- 1.FINAL IMPRESSION
 - 1.The participants will make a final impression on the phantom teeth prepared the day before using either an analogical technique (polivynylsiloxane materials) and a Digital approach (IOS)

Note: Course Materials/Instruments, Coffee Breaks and Lunch Meals are included in the program.
